The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 15-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Endo et al '150, Europe '440, applicant's admitted prior art and Chiang et al.

The rejection is maintained as stated in the paper mailed 1/28/03.

Applicant argues that Chiang et al forms the etch stop for a different purpose than in the instant invention. However, the disclosure of Chiang is reasonably pertinent to the prior art process because in both an etch stop layer is formed as part of a multilevel metallization process wherein overlying dielectric layers are patterned. The SiC etch stop material of Chiang et al would be selected in accordance with the admitted prior art process in the process made obvious by the combination.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
